

# Customer Care Information for PVC Edged and Vinyl Wrapped Doors.

PVC and vinyl wrapped doors are a durable and easy to clean product, however there are some limitations on their use in certain applications.

It is our recommendation that all end users are made aware that if **high temperatures** or **excessive water** are present this may cause the edges to peel back, which can result in failure of the product.

## Areas for particular caution are:

*If Doors are fitted adjacent to ovens, always ensure that they are shielded from heat seepage by using heat protection strips. Contact your supplier if you require more information.*

*Never use appliances that generate heat, such as a toaster, directly underneath a PVC edged or vinyl wrapped door.*

*Never allow concentrated steam (e.g. from a kettle) to be released directly underneath a PVC edged or vinyl wrapped door.*

*Never allow a PVC edged or vinyl wrapped door to become saturated with water.*

*Always fit a heat shield above dishwashers to prevent doors coming into contact with concentrated steam.*

*Doors must not be fitted any less than 750mm above a hob and extraction doors must always be opened whilst the hob is in use.*

**For cleaning use a damp cloth and a non-abrasive domestic cleaner, do not use bleach.**

**With the correct care your doors will give you many years of trouble free service. This customer care information does not affect your statutory rights.**
